ARM-R-LITE Door Mfg. Co. Inc.
2700 Hamilton Blvd.
So. Plainfield, NJ 07080

Attn. Shannon McGrady, Director of Sales & Marketing

Dear Shannon;

You may use the following testimonial in whole or in part as you deem necessary.

To Whom It May Concern;

For over twenty years I have had the opportunity to repair and install countless commercial sectional doors, primarily at major oil company service stations and major retail auto repair facilities. Although many manufacturers offer aluminum sectional doors which are similar in appearance, my experience has confirmed there is one door which continually out-performs all others. The ARM-R-LITE "Electra" and "Titan" Models are superior. ARM-R-LITE utilizes box tube components which are internally Heli-arc welded together to form the strongest section of any manufacturer. This type of construction eliminates the metal fatigue and tearing of hinge attach points, and the flexing of the sections which leads to loose meeting rails, end stiles, glazing retainers and glass breakage associated with competitive models.

I have serviced ARM-R-LITE doors that I installed twenty years ago that are structurally as sound as the day I installed them. Over the years I have also found the management and staff of ARM-R-LITE to be of the same high quality as the products they manufacture.

When choosing a door manufacturer to compliment our product line, the choice was simply, ARM-R-LITE. There is no equal! We are proud to provide ARM-R-LITE doors to our customers.

Sincerely

A handwritten signature in black ink, appearing to read "Gary L. Miller".
