To Whom It May Concern:

We have been purchasing and installing Arm-R-Lite Door Manufacturing garage doors for the past 20 years.

Our firm has established itself as a custom garage door dealer and need manufacturers who are not afraid to make custom products not just "Cookie cutter" doors as some other manufacturers do.

We are proud to have a manufacturer such as Arm-R-Lite Door Manufacturing as our best and finest garage door manufacturer.

They are continuously working to provide the best possible products available, they are fully capable to custom fabricate doors to fit our needs.

Their aluminum rails are 4 sided, this adds additional strength to the product, they weld their sections together (we don't need to worry about the sections coming apart due to loose through bolts). They use heavy gauge tracks where required.

They have the capacity to provide us with custom panel arrangement, custom glass, custom painted finish, custom designed track systems, and custom designed spring assemblies.

We have a terrific business relationship with Arm-R-Lite Door Manufacturing, starting from their inside sales department, engineering, Manufacturing, shipping and then to accounting.

In closing I am glad to have a manufacturer that still believes that "Product Quality" is still what counts in this business.

Sincerely,

Robert D. Marsh
President
