Monarch Model

The Monarch Model polycarbonate car wash overhead sectional door is designed for extreme environments. Although designed for car washes and similar applications, the Monarch Model is also applicable for greenhouses, dealerships, car care centers, homes or any other application demanding an insulated aluminum garage door.

- **Maximum Width of 30'-2"***
- **Lightweight Polycarbonate**
- **Transparent Offering 83% Light Transmission for Clear Polycarbonate**

Glazing:	Color, frosted, or clear polycarbonate thermoglazing up to 1" thick set in continuous vinyl channel and held in place with rigid plastic snap in bead.
Finish:	Standard finish color is clear anodized aluminum. Black or dark bronze anodized is also available for an upgrade. RAL Powdercoat and custom color matching are also available for an upgrade.
Hardware:	Stamped 14 gauge galvanized steel. Heavy duty full ball bearing rollers with hardened inner race. Stainless steel rollers, hardware, cables tracks, springs, and shaft is available.
Corrosion Resistance:	Stainless steel or powdercoated Corrosion Resistant Packages are available for an upgrade. Tracks and face hardware of our doors can be powdercoated or provided in stainless steel. Powdercoated steel components are not as resistant to corrosives as stainless steel, however, they do offer greater protection of these parts than standard galvanized.
