MATCHING FIXED ENTRANCE DOORS

Matching Fixed Entry Doors for Aluminum and Glass Overhead Doors

Matching entrance doors are custom designed to match and line up with adjacent Arm-R-Lite overhead sectional doors.

All aluminum and glass models by Arm-R-Lite are available with matching entry doors. Fixed entrance doors operate as regular entry doors and are not fabricated within the overhead door.

Entrance doors can be installed next to our sectional doors as shown to the left, provided there is a column or beam separating the two openings. Please consult factory regarding sideroom requirements.

Left: Door shown with fixed transoms above both entrance door and sectional door.

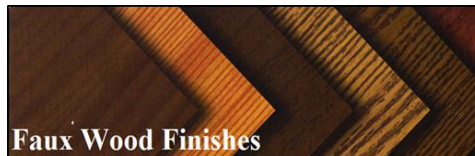

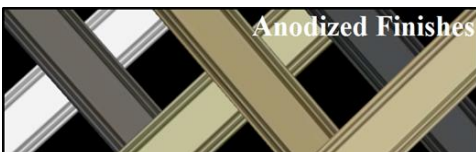

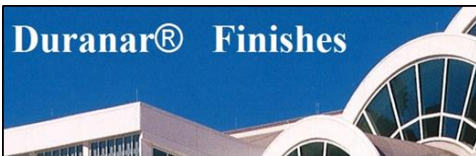

Matching fixed entrance doors can contain either glass or panel – please consult factory regarding custom glass or panel options.
