

Jon Bon Jovi's Soul Kitchen, NJ
Titan™ Model with ADA Compliant Pass Door

ADA Compliant Pass Door

Arm-R-Lite's exclusive ADA Compliant Pass Door is unique since it contains no step-over bottom rail. This ADA Pass Door is available for residential as well as commercial applications. The ADA Compliant Pass Door is built to the height and width as required by ADA guidelines and local codes. Some requirements include either a solid bottom panel or 10" high "kick plate." A leveled floor is required and ADA Compliant Pass Doors are not available on projects with sloped or uneven floors. The ADA Pass Door comes with standard hardware, however, custom hardware or panic bar upgrades are available. The ADA Pass Door is located in the center of the door assembly and designed to swing out only. The Pass Door can contain solid aluminum panels, 1/8" tempered glass or a lightweight glazing alternative. The overhead door must be motorized with a pass door interlock switch. The ADA Compliant Pass Door is available on our Titan™ or Custom C.I.™ models.

- **No Step-Over Bottom Rail**
- **Standard, Vertical or High Lift**
- **5-Year Welded Frame Warranty***
